CONNECT Modules website has a NEW look!

Based on feedback from you, we have revised the CONNECT Modules site. While all module content remains the same, we have reorganized the site to make it easier for you to find what you need, such as support materials for instructors. Here is a highlight of site updates. Come and explore!

GO TO CONNECT Modules >

FOR INSTRUCTORS (Module Dashboards)

Module Dashboards are homepages for each module that provide all of the resources instructors need to teach the module content. Resources include links to learner materials (i.e., activities, handouts, video and audio clips) as well as instructor materials such activity guides with facilitation tips and suggested assessments, personnel preparation standards and OSEP indicators and outcomes related to the module content, as well as downloadable versions of video and audio clips.

INSTRUCTOR SUPPORTS

In addition to the Instructor Module Dashboards, this section is full of extra supports to help you get started and use the modules. Resources include a video on how to get started, video tours of the site, links to instructor discussion boards, teaching tips, and frequently asked questions.

5-STEP LEARNING CYCLE

CONNECT Modules are designed using a 5-Step Learning Cycle. Learn more about this innovative approach for making evidence-based practice decisions.

MODULES

The learner section of the site where the modules are located remains the same. Within this Module section, all of CONNECT’s current modules are listed. Each module contains activities, handouts, videos,
and audio clips centered around a particular early childhood practice and uses a 5-Step Learning Cycle to guide learners through an evidence-based decision making process.

**RESOURCE LIBRARY**

This section allows you to browse all available learner resources in all modules or search for specific resources.
